

Please change the title of the invention to read
--NETWORK SYSTEM INCLUDING A TERMINAL DEVICE CAPABLE OF
REGISTERING WITH A SERVER--.

IN THE CLAIMS

Please amend claims 1 and 3 by rewriting same to read
as follows, cancel claims 2 and 4-8, without prejudice or
disclaimer, and add new claim 9.

Sub C
B
--1. (Twice Amended) A network system formed by
connecting a terminal device and a network server via a
known communication system, wherein

said terminal device comprises:

removable memory means for storing user specific
information, and

means for transmitting said user specific information
and information of said terminal device used by a user as
specific information when said memory means is loaded; and

said network server comprises:

means for receiving said specific information
transmitted by said terminal device,

means for registering said specific information when
obtaining a session with said network server, and

means for specifying said terminal device being used by

Sub C17
B1
said user by memorizing said specific information.

Sub C27
B2
--3. (Twice Amended) The network system according to claim 2, wherein said means for registering erases said registered specific information when said memory means is extracted from said terminal device.

Sub C37
B3
--9. (New) The network system according to claim 1, wherein said network server further comprises means for sending a notification to said terminal device registered by said means for registering.--
